

## Privacy policy

# Information on cookies and user's settings

### What are cookies?

Cookies are small text strings which websites visited by users send and store on their computer or mobile device to be later sent back to the website when a user returns for another visit. The purpose of cookies is to remember user actions and preferences, such as website display language so that it does not have to be selected again when the user browses through pages on the same website or returns at a later date. Cookies are therefore used to perform authentication operations, browser session monitoring, and storage of information on user activities for statistical and advertising purposes. When browsing through a website, the user's computer or mobile device may also receive cookies from web servers other than the one being visited, these are known as "third-party cookies". Cookies cannot gather any information stored on your computer or in your files. Cookies may be session cookies (erased automatically when the web browser is closed) or permanent cookies, with or without an expiry date.

### How we use cookies

In accordance with the legislation in on the use of cookies two macro-categories of cookies have been identified.

### Technical cookies

Technical cookies are those used for the sole purpose of carrying out the transmission of a communication over an electronic communications network or to the extent strictly necessary for the provider of an information society service explicitly requested by the subscriber or user to provide this service. They are not used for any other purpose and are usually installed directly by the website owner or manager.

### Profile cookies

Profile cookies aim to create profiles relative to the user and are used for the purpose of sending advertising messages in line with the preferences shown by the user when browsing on-line. Due to the particularly invasive nature which

such devices may have within the user's private sphere, EU regulations stipulate that the user must be adequately informed on their use and express, therefore, his/her valid consent.

Among the technical cookies which do not require express consent for their use, the Guarantor for the protection of personal data includes:

- browser or session cookies (e.g. for authentication) which guarantee normal browsing and use of the website;
- functional cookies which allow the user to browse based on a number of selected criteria (e.g. language, or wish list) in order to improve the service provided to the user;
- first-party analytical cookies, i.e. those cookies used directly by the website manager to collect information, in an aggregate form, on the number of users and how said users visit the website;

Analytical cookies may also be third-party cookies. In this case, these are analytical cookies created and installed by third parties to analyze user browsing behavior, create website visit statistics and improve the contents provided, show a selection of similar products and possibly place targeted advertising on the web pages.

The system used on this website is Google Analytics, a web analysis service provided by Google LLC ("Google"). Google Analytics uses cookies to allow the website to analyze how users actually use it. The information generated by cookies on how users use the website (including IP address) is transmitted and stored in Google servers located in the United States. Google uses this information for the purpose of tracing and examining the use of the website, to compile reports on website activities and provide other services relative to Internet use. Google may also transfer this information to third parties whenever this is required by law or when said third parties handle the aforementioned information on Google's behalf.

Users may, in any case, block the use of cookies by selecting the appropriate setting in their web browser, but this could inhibit some of the website's functions. Since the IP address is not hidden, the use of these cookies requires user consent.

The <http://localhost:8888/EvergoWP> website employs only third-party analytical cookies and technical cookies with the settings described above.

### **Managing cookie preferences**

Consent to the use of third-party analytical cookies is granted by:

- simply closing the banner containing the short cookie policy notice which appears when the user first enters the website; or
- continuing web site navigation.

## How to change cookie settings

Most Internet browsers are initially set-up to automatically accept cookies. This means users have the option, at any time, to set their browsers to accept all cookies, only some cookies or to block them entirely, disabling their use by websites. Furthermore, users can usually set preferences in their browsers to ensure they are notified whenever a cookie is stored on their computer. Finally, at the end of each browsing session users may delete any cookies collected from their device's hard disk. If they wish to delete cookies installed in the browser's cookie folder, it is important to remember that each browser has set up different procedures for managing settings.

By choosing the relevant link from the list below, users can obtain specific instructions for some of the most commonly used browsers; in particular, this web site uses the following cookie:

\_ga (Google Analytics)

\_gat (Google Analytics)

PHPSESSID (technical cookie for the session)

Display Cookie Content (technical cookie which memorizes the choice about cookie policy)

- In the case of sessions opened on Facebook following Facebook could be installed:
  - act – c\_user – csm – datr – fr – i\_user – lu – p – presence – s – x-src – xs – datr – lu
- In case of a Google opened session, google.com might install following cookies:
  - AID – APISID – HSID – NID – OGP – OGPC –PREF –SAPISID – SID – SSID – TAID – OTZ – PREF – ACCOUNT\_CHOOSER – GAPS – LSID – LSOSID – RMME
- In case of a Twitter opened session, Twitter might install the following cookies:
  - o \_twitter\_sess, auth\_token, auth\_token\_session, guest\_id, k, lang, original\_referer, remember\_checked, secure\_session, twid, tell

Data controller and data protection officer

The data controller of your data is Khalifa Al Mannai, based in Manama, Kingdom of Bahrain; email: [admin@evergoapp.com](mailto:admin@evergoapp.com)

In this capacity, he is responsible for ensuring the application of the necessary and appropriate organizational and technical measures for the protection of your data, as further detailed in the privacy policy of this website.

### **Mandatory nature of data provision**

Personal data processed through the installation of first-party technical and analytical cookies are necessary to ensure correct browsing within the website.

Consent to the installation of third-party analytical cookies is optional. Your personal data will be processed by these cookies only once your consent has been provided in the manner indicated above.

### **Cookie notification banner text:**

This website uses cookies. By continuing to browse the site you are agreeing to our privacy and cookie policies.
